

The International Hellenic University

is pleased to invite you to hands-on workshop titled

Mobile App Development

New Business Opportunities

on

Monday May 14th 2012, in the International Hellenic University Computer Labs from 11.00-20.00

Mobile App Development is recognised as the one of the most desired professional skills in the IT job market worldwide. Acknowledging the need to provide state-of-the-art professional skills to young early-stage professionals, the International Hellenic University organises this 8-hour long hands-on workshop, that will address both cross-platform and native applications development, as well as important business and design related aspects.

Attendance is **free** for graduates or senior students of Computer Science, Electrical Engineering or any other technology related school with basic computer programming skills.

Scientific Coordination: Prof. Ioannis Vlahavas, Dean, School of Science and Technology

The working language of the workshop is **English**. Attendance certificates will be provided upon request.

Important: Prior registration is required to apply for the workshop as there are limited places available. To register please click here www.ihu.edu.gr/mobile2012

Attendees will be notified by email for their selection. You can attend the workshop only have received an email with a positive response to you registration.
